

Quality Installation Training Opportunity

In order to participate in most utility cooling rebate programs, you must install equipment using a Quality Installation (QI) method. This training will guide you through the steps necessary to successfully complete a QI.

A unique partnership among the Great River Energy member cooperatives, the Minnesota Heating and Cooling Association (MHCA) and Xcel Energy is proud to announce QI training by Chris Compton.

Chris Compton has a total of 28 years experience in the HVACR field. He's certified at the Installation and Service level in all five of the NATE certifications. In 1998 he was selected as one of the top 10 outstanding Trades and Industry Educators in the U.S. by ACTE (Association of Career and Technical Education, formerly AVA, American Vocational Association). He received the Imperial award from RSES for his CMS (Commercial Refrigeration) in 1997 and is a CMS member of RSES.

Come to the three-hour training sessions to:

- Hear about utility rebates from Xcel Energy and your local electric cooperatives
- Find out exactly what you should be doing to successfully complete the QI portion of the cooling rebate forms
- Understand the role MHCA plays in educating the HVAC trades and the benefits of membership

Date	Time	Location
Monday April 4 th	8 AM & 1 PM (2 sessions)	Great River Energy headquarters, 12300 Elm Creek Blvd, Maple Grove, MN 55369
